📍 : Memon Muhalla, Shikarpur, Sindh.

DETAILS

Date of Birth:

11/26/2005

Gender: Female

Marital Status: Single

Nationality: Pakistan

SUMMARY

Computer Science (BSCS) 3rd year student with a strong interest in Software Engineering and Web Development. Skilled in Python programming, JavaScript, and React.js with a focus on building practical, real-world projects.

Currently developing applications like a Weather App and Movie Search App using APIs and modern web technologies.

Highly motivated, quick learner, and eager to contribute in an internship role to gain industry experience and improve development skills.

SKILLS

Python

Java

CSS

HTML

Java Script

C#

React.js

Tailwind CSS

API Integration

CERTIFICATE

Basics of Agents & Environments in AI	JUNE 2026
Basics of Python	JUNE 2026
Community Member badge	MARCH 2026
Python Coder badge	MAY 2026
Google UX Design	AUGUST 2025
Google Prompting Essentials	JUNE 2025
Google Cybersecurity Professional Certificate	JUNE 2025

ACCOMPLISHMENTS

Projects

• Job Portal with Skill Matching (C#, SQL)

Developed a desktop-based job portal system with multiple modules including candidate management, job postings, and automated skill-based matching using C# Windows Forms and SQL database integration.

LANGUAGE

Urdu

English

Sindhi

HOBBIES

Web Development

Frontend

Development

Python Programming

Problem Solving

API Development

SOCIAL LINKS

in

<https://www.linkedin.com/in/khadeeja-memon-cs>

• Banking Networking System (Cisco Packet Tracer)

Designed and simulated a secure banking network system connecting multiple departments using routers, switches, IP addressing, and basic routing concepts.

• Boyer-Moore Algorithm GUI Application (C# .NET)

Built an interactive GUI-based string matching application implementing Boyer-Moore algorithm with Bad Character and Good Suffix rules, including step-by-step visualization.

• Movie Search App (React.js + OMDb API)

Developed a responsive web application using React.js that fetches real-time movie data from OMDb API and displays title, poster, and release year.

• Weather App (React.js + OpenWeather API)

Created a weather forecasting app using React.js with API integration to display real-time temperature, humidity, and weather conditions based on user input.
